About this item

- 3D-Touch V3.2 is the accessory for automatic levelling of the new generation FDM 3D-printer. It has been built with the latest technology and can accurately measure the inclination of the incubator
- It can be used for incubators made of glass, wood, metal, etc. Users no longer need to manually level the incubator, allowing users to level hot beds more easily and quickly and improving printer success rates and print accuracy
- Equipped with a new structural design for higher precision, 3D-Touch V3.2 can be widely used in various FDM 3D-printers. It is a necessary accessory for 3D-printers
- The pressure pin is pressed twice to check whether the power supply is switched on. The LED-indicator flashes when a problem is determined during a self-test or operation. The standard deviation of the Geeetech 3D-Touch repeatability is approximately 0.005 mm
- Box contents: 1 x 3D-Touch, 4 x M3 screws, 2 x M3 nuts, 1 x metal bracket, 1 x 18 cm cable, 1 x 100 cm cable.

Einfach zu Installieren und Bequem zu Verwenden

Simple to set up and use

1. Mounting bracket

2. Cable access to 3D touch

3. Cable through the bracket

4. Mounting screws

5. Correctly connect the cable to the motherboard

6. Download the corresponding model firmware

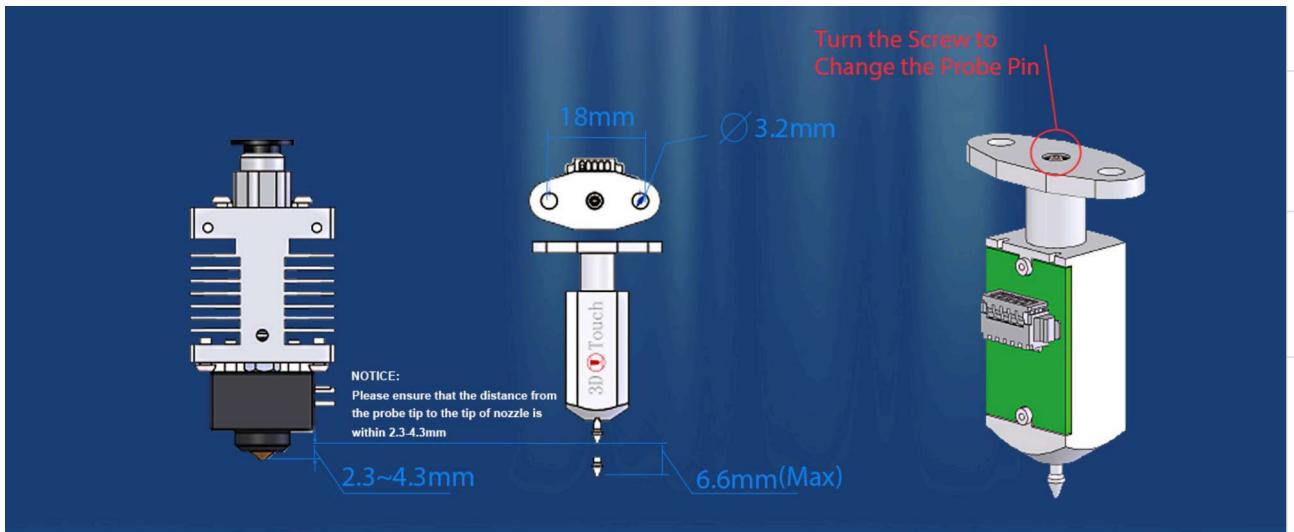

7. Program into the SD card into the machine download

8. Start to use

Wenn das 3D-Tastsystem eingefahren ist, stellen Sie bitte sicher, dass der Höhenunterschied zwischen der Tastspitze und der Düse innerhalb des Bereichs von 2,3-4,3 mm liegt. Andernfalls kann es zu Schäden am 3D-Tastsystem kommen oder es kann nicht richtig gemessen werden.

Yasmin

★★★★★ Richtig gut

Reviewed in Germany on 15 May 2024

Size Name: V3.2 | **Verified Purchase**

Der BL Touch bietet eine bemerkenswert präzise Nivellierung für 3D-Drucker. Seine hochwertige Verarbeitung ermöglicht ein problemloses Setup: Einfach auspacken, am Drucker montieren und das Nivellieren beginnen. Selbst für erfahrene Anwender ist der BL Touch eine verlässliche Wahl. Mit seiner bewährten Leistung und Zuverlässigkeit ist er ein unverzichtbares Upgrade für jeden 3D-Druck-Enthusiasten.

★★★★★ Top-Touchsensor (3DTouch V3. 2 pro)

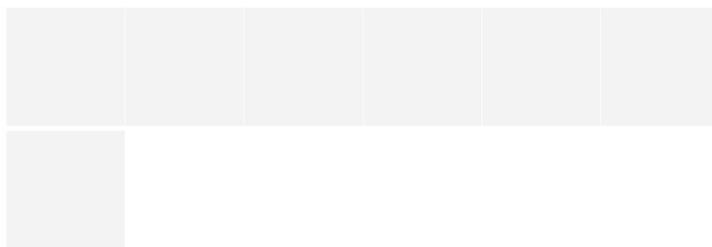

Reviewed in Germany on 24 February 2022

Size Name: V3,2Pro | **Verified Purchase**

3D Touch Pro V3.2
am Ender 3 - 1. Version, mit Silent board v. Creality V4.2.2

Um mir das Leben etwas leichter zu machen habe ich mir schon seit längerem einen Touch Sensor gewünscht. Meine Auswahl fiel dabei auf den 3DTouch Pro V3.2 von Geeetech, der recht gut bewertet war. Am Wochenende bestellt war die Lieferung Montags zu Hause. Gestern hatte ich dann die Muse um das Teil einzubauen und Hardware- wie Softwareseitig zu justieren.

Nachdem ich mich bei allem etwas durchgehängelt habe (Es liegt keine Installations- oder Bedienungsanleitung bei), macht das Teil einen guten Job. Der sonst oft so problematische First Layer gelingt jetzt nahezu perfekt. Viele Youtube Videos haben mir Gott sei Dank geholfen, ohne Frust recht zügig zum Erfolg zu kommen.

Ax

★★★★★ A slight hassle to install but it works!

Reviewed in Germany on 5 February 2024

Size Name: V3.2 | **Verified Purchase**

Product comes with a multiple mounting adapters as well as motherboard adapter.
Following BLtouch tutorial online made the installation easy as this is a straight up clone of it.

Biggest hurdle and obstacle is the wires. They are way too short for the Ender 3 V2 and the pins/plug is not suitable for the motherboard. It does not lock the wire heads in place on the pins. Due to the shortness, I had to solder and get a 5 pin JST extension cable. Because I did not have electric tape or small enough connectors for the 2 ends, I printed small boxes/enclosures and used glue to cover the soldered ends.

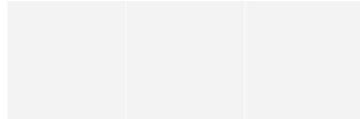

With this added length, I was able to sort the cable with the rest of the cables on the machine and route it through the nylon sock, all the way next to the hotend to the probe.

After initial configuration and leveling. I have not needed to worry about the bed leveling even after 20 prints. Best is to pick a tutorial and follow that to get it working.

★★★★★ Gute Werte beim nevelieren meines Druckbettes

Reviewed in Germany on 9 June 2024

Size Name: V3.2 | [Verified Purchase](#)

In wenigen Minuten habe ich das Produkt an meinem 3D Drucker angebracht. Der Anschluss ist gut erklärt der Sensor arbeitet zuverlässig und die Ergebnisse beim ausrichten meines Druckbettes sind sehr gut alles in allem bin ich zufrieden. Ich habe genau das erhalten, was ich gesucht habe und würde das Produkt jederzeit wieder kaufen und kann es klar empfehlen.

Peter Mackiewicz

★★★★☆ Eher unzufrieden

Reviewed in Germany on 18 November 2023

Size Name: V3.2 | [Verified Purchase](#)

Produkt ist OK nur das KABEL ist selbst für einen Ender 3 v2 ist DEFINITIV zu Kurz, ich musste alle verlängern. Auch ist Fraglich welches Board heute noch diese Anschlüsse benutzt. Dadurch ist folgendes passiert, Bltouch eingebaut, firmware auf karte dann eingeschaltet, am Mainboard ist dann ein bisschen Rauch aufgestiegen und es hat verbrannt gerochen. Ich habe den Drucker sofort ausgeschaltet und den bltouch wieder gelöst 🙄 😱 Ich hatte die Kabel falsch herum aufgesteckt da der Stecker nicht eindeutig ist. Glücklicherweise läuft der Drucker mit dem BLtouch jetzt. Aber nur mit Stress und fummellei.

A. Fries

★★★★★ Funktioniert perfekt

Reviewed in Germany on 2 May 2024

Size Name: V3,2Pro | [Verified Purchase](#)

Ich habe einen meiner 3D-Drucker auf einen aktuellen Level upgedatet und dazu gehört auch ein automatisches Bed-Leveling.
Ich wusste vorher nicht, dass es Clones und das Original gibt. Bei den Clones, so las ich, gibt es Sonne und Schatten.
Hier kann ich nur Positives berichten. Der Lieferumfang ist erstaunlich umfangreich. Unterschiedliche Halter und Kabel. Ein tolles Set. Die Einrichtung unter Klipper entspricht dem Original und die Genauigkeit ist perfekt.
Ich möchte nicht mehr darauf verzichten.
Eine Empfehlung

Raph

★★★★★ Genau und konsistent

Reviewed in Germany on 17 June 2024

Size Name: V3.2 | [Verified Purchase](#)

Mein 3D Drucker kam bereits mit einer Load-Cell zum Druckbett vermessen, die Ergebnisse davon waren aber kaum zu gebrauchen. Die Ergebnisse von dem hier sind wiederholbar und genau und dazu auch noch deutlich schneller als mit der Load-Cell. Dadurch kann ich vor jedem Druck jetzt auch problemlos jedesmal das Bett vermessen lassen ohne das es einen erheblichen Teil der Druckzeit ausmacht.
Klare Empfehlung wer noch nichts zum Bett vermessen hat oder auch nur eine Load-Cell die semi verwendbare Ergebnisse liefert.

 Alfio

 **Migliora tantissimo la stampa 3D!**

Reviewed in Italy on 14 June 2024

Size Name: V3,2Pro | **Verified Purchase**

Qualità costruttiva perfetta, progettato benissimo in ogni sua parte.

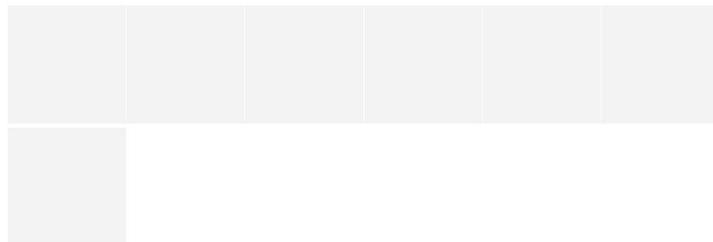

Il sensore di autolivellamento viene fornito con tutto ciò che serve: sensore, cavetti, prolunghe, adattatori, supporti, etc...

Le spiegazioni per il montaggio sono facilissime e ha funzionato al primo istante.

Dopo averlo montato sulla mia stampante 3D, non è stato più necessario regolare le 4 viti sotto il piatto: basta far partire il sensore di autolivellamento e lui fa tutto il resto: calcola tutte gli eventuali dislivelli del piatto e compensa in fase di stampa.

Secondo me è obbligatorio su ogni stampante 3D: evita tutta la perdita di tempo che si ha durante la calibrazione manuale.

Lo consiglio vivamente!

Great addition to the A10M I've installed it on, works perfectly, has a great tolerance (+0.005) and is half the price of competitors!

What's not to love about that?!

This is where a little bit of knowledge of firmware editing helps get this thing set up to its Report
