Product Description

Nema 17 Stepper Motor 1A 17Ncm

High Torque

STEPPERONLINE stepper motor Adopting high quality motor steel material, is provided with high torque (17Ncm), low self-inductance reactance, responsive and can avoid system error.Low loss stators have better high speed performance.

Low Resistance

STEPPERONLINE stepper motor can get a lower resistance value compared to motors of the same thickness and torque. This considerably increases the thermal conductivity of the motor. This effectively reduces the increase in temperature

Wide Application

This small stepper motors can be used in various area, such as 3D printer; stage lighting; laser engraving; textile machinery; medical equipment; placement machine; non-standard equipment; automation equipment etc.

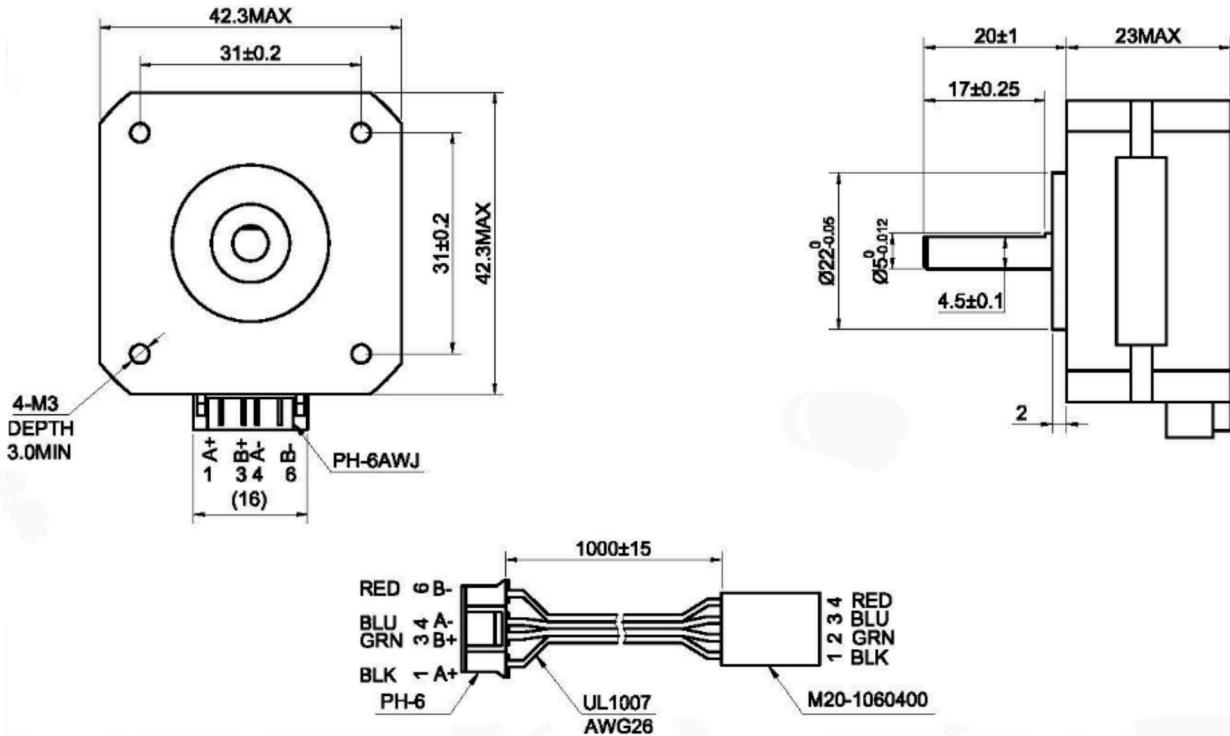

Electrical Specification

- Manufacturer Part Number: 17HE08-1004S
- Motor Type: Bipolar Stepper
- Step Angle: 1.8 deg
- Holding Torque: 17Ncm
- Rated Current/phase: 1A
- Phase Resistance: 3.6ohms
- Inductance: 4.0mH ± 20%(1KHz)

Heinz

★★★★★ funktioniert als Extruder Stepper super

Reviewed in Germany on 28 April 2024

Size Name: 1 pack | Colour Name: 42*23 | **Verified Purchase**

Ich habe meinen 3d Drucker auf einen direkt Extruder umgebaut, und dafür einen neuen leichten und leistungsstarken Stepper Motor gesucht, und mit diesem Gefunden.

Läuft eine Schrittverlusten stundenlang ohne Probleme.

Siegfried Schnitzler

★★★★★ Fräse verstärken

Reviewed in Germany on 26 September 2023

Size Name: 1 pack | Colour Name: 42*48 | **Verified Purchase**

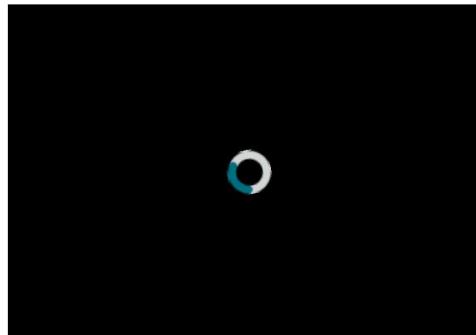

Da die 3018 Fräse mit sehr schwachen NEMA17 ausgestattet war, habe ich diese gegen die etwas stärkeren ausgetauscht. Nun kann man auch höhere Geschwindigkeiten fahren ohne Schrittverluste.

Joshua

★★★★★ Works great!

Reviewed in the United States on 18 May 2024

Size Name: 1 pack | Colour Name: 42*23 | **Verified Purchase**

Overall I am very pleased with this stepper, it's more than strong enough to power through my filaments at whatever speed I want.
 I attached an aftermarket heat sink to all of my steppers but I have to say this one runs much cooler than the others.
 The pricing is very competitive and it was worth every penny.
 All in all, good torque, great performance, much lighter than

the stepper I had before, perfectly suited my needs

One person found this helpful

Eal12333

★★★★★ Powerful! Enjoying it a lot.

Reviewed in Canada on 4 November 2023

Size Name: 1 pack | Colour Name: 42*48 | **Verified Purchase**

I'm using this on my highly modified Ender 2 Pro (a bedslinger), as a replacement Y axis motor. It's quite powerful and relatively quiet (I was using a random stepper from an Anet A8 before this, and this one is definitely way quieter. The volume is about the same as the original Creality motor that I had, but this new one is much deeper in pitch).

Here's my setup and my max speeds:

- ~1.2A at 24V (my driver can only output 1.4 safely, so I didn't wanna push it), and the belt

is pretty tight. I have a 165mm glass bed.

- Stepper motor is just warm to the touch.

- over 5000mm/s² doesn't seem to risk skipped steps.

★★★★★ Works well

Reviewed in Sweden on 29 April 2024

Size Name: 1 pack | Colour Name: 42*30 | **Verified Purchase**

Does what it should. It's nice that it has a detachable cable.

[Report](#)

DreamCatcher

★★★★★ Perfecto

Reviewed in Spain on 8 January 2024

Size Name: 1 pack | Colour Name: 42*23 | **Verified Purchase**

Necesitaba urgentemente un motor de baja altura para un proyecto y encontré este. No muy caro y funciona bien.

El mío tiene para las bobinas estos colores: Rojo-verde, azul-negro. Es un código de color diferente del que uso habitualmente, pero no supone problema alguno, se cambian los cables de orden y ya está.

En cuanto al par evidentemente tendrá menos que un motor de mas altura, pero este va a una reductora y hace bien su trabajo conservando suficiente par y poco peso, lo adecuado para el proyecto.

A mi me ha funcionado perfectamente y no me parecido caro para lo que hay por ahí. Comprará más cuando los necesite sin dudarlo.
